## **Barnik Invest Makes Initial Investment in MedStorm Innovation AS**

SOLNA, STOCKHOLM REGION, SWEDEN – December 15, 2025 – Barnik Invest announces an initial investment in MedStorm Innovation AS. MedStorm Innovation is a medical technology company specializing in the objective, real-time assessment of pain and nociception across all age groups.

MedStorm's core technology measures skin sympathetic nerve activity via skin conductance, reflecting changes in emotional sweating triggered by acetylcholine on muscarinic receptors. This provides clinicians with an accurate, numeric output to guide pain management and treatment.

Founded by Professor Hanne Storm, MD, PhD, at the University of Oslo, MedStorm began research in neonatal pain assessment in 1999. The company's CE-certified PainMonitor, launched in 2009, is widely adopted and validated by over 80 independent studies for guiding analgesic dosing in NICUs, PICUs, and surgical settings.
